

MINUTES OF THE MEETING

'THE NAIVE BAKER'

[The Naive Baker. Meeting-1]

[30/1/2023]

Attendees: All present

Agenda: Discussion about the topics allotted by the course instructor

Summary: We all talked about the different project topics that were offered to us and selected five in decreasing order of importance. A few issues regarding the implementation of our project and what and how we will present our project. We also selected the group leader..

RoundTable: As of now the entire group will be divided in two parts mainly the frontend and backend. Since the topic hasn't been allotted to us, the assignment of frontend and backend to a member remains as a future task.

[The Naive Baker. Meeting-2]

[7/2/2023]

Attendees: All present

Agenda: Preparing for the implementation of the project

Summary: A brief discussion as to what all we will include in our project. Various functionalities that have to be included were discussed. All the members decided to make a web interface. It was also decided that all the members in this one month period should learn some technology like UI development, javascript, etc.

[The Naive Baker. Meeting-3]

[8/2/2023]

Attendees: All present

Agenda: To discuss the functional and nonfunctional requirements of our project and at the same time decide which software engineering model we will follow.

Summary: In the lab session we have discussed the above following and have finalized each detail.

RoundTable: No more addition to the project has taken place, the main development phase will begin in a few days.

[The Naive Baker. Meeting-4]

[17/2/2023]

Attendees: All present

Agenda: To know the progress and difficulties if any people are facing while learning the technologies.

Summary: A short meeting, discussed a few problems and platforms from where properly we could learn the technologies.

RoundTable: No more addition to the project has taken place, the main development phase will begin in a few days.

[The Naive Baker. Meeting-5]

[28/2/2023]

Attendees: All present

Agenda: To know the progress of people, the technologies learnt, further decisions to be made.

Summary: A general review on the progress of the technologies learnt was done, we decided to work with Javascript as the language, and decided to use NodeJS as the runtime execution environment for Javascript. The frontend structure was decided, followed by the segregation of people in the frontend and backend. Majority of them were put in the frontend since the backend work was a little less as compared to the frontend. All those who were part of the frontend team decided to make basic pages so as to start making a basic functional website.

RoundTable: Till now only the prototype is ready, first everyone will be working on the documentation part extensively followed by segregation in frontend and backend teams.

[The Naive Baker. Meeting-6]

[16/3/2023]

Attendees: All present

Agenda: Updates on each task

Summary: Everyone was asked to update how much of the task has been completed and discuss if there are any issues coming in the set up.

[The Naive Baker. Meeting-7]

[28/3/2023]

Attendees: All present

Agenda: To prepare for the mid semester evaluation, how much have the frontend and backend teams progressed, to know the SRS progress, and diagrams.

Summary: Use case diagram is ready, activity diagram is also ready. SRS is in progress, activity diagrams and use case diagrams added in it. Presentation for the mid-semester evaluation ready.

RoundTable: The frontend team will now start with the designing of web pages with the help of the SRS, backend teams have started with the development of very basic APIs like the login.

[The Naive Baker. Meeting-8]

[2/4/2023]

Attendees: All present

Agenda: To include the suggestions given during the midterm evaluation and decide how we must proceed with the website.

Summary: The actions were decided as to what all we can do on the web pages, more pages to be added were discussed, SRS was reviewed, modified and appended a bit.

RoundTable: The backend team is making APIs and has also started working with the database i.e. MongoDB. The Frontend team has designed a few web pages and now since the base is decided, the actions will be put on the pages.

[The Naive Baker. Meeting-9]

[10/4/2023]

Attendees: All present

Agenda: Discussion about the integration of frontend and backend and review the progress.

Summary: It was a short meeting wherein we discussed the integration of the project, also discussion about testing was done, a review was done on the frontend and the backend teams.

RoundTable: Frontend team is almost done with the designing of the web pages, only a few left. Backend teams have completed the development of APIs and also will be starting with the integration part.

[The Naive Baker. Meeting-10]

[23/4/2023]

Attendees: All present

Agenda: To divide the documentation work, discussion about the integration and testing.

Summary: The final documentation work which needs to be presented was divided amongst everyone, integration work was discussed, and is already in progress.

RoundTable: Frontend team is done with the designing with the web pages along with the actions. A few problems were resolved and integration has also started.

[The Naive Baker. Meeting-11]

[25/4/2023]

Attendees: All present

Agenda: Review of final SRS, integration, start with the making of presentation.

Summary: SRS is completed, integration is also done, what all to be added in the presentation slides also discussed.

RoundTable: Powerpoint slides in progress.

[The Naive Baker. Meeting-12]

[27/4/2023]

Attendees: All present

Agenda: Final review of everything

Summary: Discussing all the tasks that were performed and preparing for the evaluation.

RoundTable: Everything reviewed successfully.
